SUMMARY

Technical writer with experience working on a software platform that allows companies to leverage artificial intelligence (AI) in smart machines. Expertise in creating engaging, user-focused documentation. Excited to enhance client experience and optimize feedback from stakeholders.

SKILLS

Technical Writing, Document Management, Hugo, Atlassian, Python, Golang, Project Management, Content Strategy, API Documentation, User Manuals and Guides, Tutorials

EXPERIENCE

01/2023 - 02/2025

New York, New York

Technical Writer

Viam

- Owned and maintained the Data/AI documentation, collaborating with engineers, PMs, and other stakeholders to ensure accuracy and usability.
- Wrote scripts and tested code samples in Python, Go, and Flutter, enhancing developer experience with well-documented examples.
- Helped develop a Python-based system to automate SDK documentation, improving efficiency and consistency.
- Contributed to the Viam documentation site.
- Documented smart machine technologies using Hugo and Markdown, ensuring clarity and accessibility.

07/2022 - 12/2022

Austin, Texas

DevOps Engineer

Camp Gladiator

- Worked closely with all Camp Gladiator engineering teams to maintain the Camp Gladiator organization's Cloud network infrastructure and resources hosted by the Google Cloud Platform.
- Focused on assisting the organization in its migration from a legacy monolithic architecture to a fully cloud-based environment with microservices architecture.
- Completed projects focused on modernizing operations and easing developer workload, implementing tools for improving observability and reducing build time.
- Leveraged my engineering skills to improve CI/CD pipelines with tools like Cypress and Locust load testing.

06/2021 - 07/2022

Remote

QA Test Automation Engineering Intern

Camp Gladiator

- Part of a focused Agile team, working fully remotely to coordinate with multiple product and engineering teams to design automated tests for Camp Gladiator's web platform.
- Designed front-end tests in Python with Robot Framework / Selenium, and using Pytest-BDD to contribute to designing an API test framework for Camp Gladiator.

EDUCATION

09/2018 - 05/2022

Waterville, Maine

Bachelor of Arts in Computer Science and Psychology, Minor in English

Colby College

KEY ACHIEVEMENTS

Award-winning documentation site

Contributed to the Viam documentation site, which won Best Overall Devportal and Best Visual Design at the 2023 Devportal Awards.

Automation

Created a Python system to automate the SDK API methods documentation for Viam.
